

DNA FINGERPRINTING IN FORENSICS MEDIA ROUND TABLE

25 March 2009

Public Understanding of Biotechnology Programme

DR MARÍA EUGENIA D'AMATO

Eugenia is Research Manager at the Forensic DNA Laboratory in the Department of Biotechnology at the University of the Western Cape. She obtained her PhD from the University of Buenos Aires in Argentina in 1996. Her current research focuses on Human population genetics and genetic diversity, and the development of human DNA identification systems.

She is a member of the International society for Forensic Genetics and the South African Society of Human Genetics. She has 18 peer reviewed publications, has presented at 17 international and 12 local conferences and has produced 2 PhD graduates and 5 MSc graduates.

Her skills include current research in molecular genetics laboratory techniques, ancient DNA techniques for archived material and forensic material, PCR, RFLP, DNA sequencing, automated genotyping, isolation of microsatellite markers and cloning. She also has expertise in various data analysis skills.
